

Commvault And Hewlett Packard Enterprise Partner To Bring Seamless Backup And Recovery To The Cloud

October 9, 2018

-- Building on Long-Standing Partnership, New integrations with HPE StoreOnce Catalyst Help Customers Meet Evolving Data Protection and Compliance Challenges --

TINTON FALLS, N.J. and NASHVILLE, Tenn., Oct. 9, 2018 /PRNewswire/ -- [Commvault](#) (NASDAQ: CVLT), a recognized global leader in backup, recovery, the cloud and data management across any hybrid environment, today announced full integration between Commvault Complete™ Backup & Recovery Software and Hewlett Packard Enterprise (HPE) StoreOnce systems, including integration with HPE StoreOnce Catalyst. This joint solution allows Commvault to manage the full lifecycle of data management operations for HPE StoreOnce systems. Seamless integration between HPE StoreOnce systems using Catalyst Copy meets evolving backup, recovery, and compliance challenges, while tightening resource requirements and responding to the ever-expanding data growth that customers are facing. The announcement was made today in Nashville at [Commvault GO 2018](#), the company's annual customer conference.

Together, the integration of Commvault Complete™ Backup & Recovery Software, which Commvault believes is the industry's most fully featured and comprehensive backup and recovery solution, with HPE StoreOnce systems, optimizes storage costs, reduces network traffic, provides seamless data mobility and simplifies data management. Additionally, users can move backup data natively, reliably, and cost-effectively to the public, private, or hybrid cloud. This capability is delivered by HPE Cloud Bank Storage, a feature that is scheduled to be supported by an upcoming HPE software release in November of this year.

The new solution from Commvault and HPE includes support for low bandwidth mode (source-side) deduplication that reduces redundant data, minimizes automated movement of data to lower cost storage as data ages based on user-defined policies, and includes support for synthetic, full backups using Catalyst Clone.

"Through our partnership, we are delivering proven solutions that let customers manage the protection of their data assets, regardless of where they may be located," said Patrick Osborne, HPE Vice President and General Manager of Big Data and Secondary Storage. "HPE and Commvault provide a data management and storage platform that enables the movement, management and use of data across on-premises and cloud locations."

StoreOnce Catalyst can be easily configured using the Commvault user interface with just a few clicks. Once enabled, Commvault manages the backups and the movement of data for HPE StoreOnce systems the same way it does for any other Commvault client. Based on the level of integration, no additional client configurations are required. Future StoreOnce Catalyst updates will be included in the regular Commvault service packs with no need for customers to manage the update cycle independently.

"Commvault and HPE are committed to our strategic global alliance and providing customers with industry-leading software and hardware solutions that are unmatched by the competition," said Owen Taraniuk, Head of Worldwide Partnerships and Market Development at Commvault. "This expansion of our joint offerings allows us to meet new market use cases and implement holistic data management strategies that help customers accelerate digital transformation initiatives and reduce IT complexity."

The integration between Commvault Complete™ Backup & Recovery Software and HPE StoreOnce systems [extends on Commvault's growing partnership with HPE](#) to expand Commvault's reach with new HPE customers across various markets.

Commvault GO 2018

Commvault GO 2018 is Commvault's annual customer conference that brings together a global audience of data experts, customers, partners and influencers in the most engaging and entertaining event dedicated to data protection and management. This year's event is being held at the Gaylord Opryland Resort & Convention Center in Nashville, Tenn, on October 9-11. With an inspiring keynote line up including Bill Nye "The Science Guy," entertainer, Steve Connell and globally recognized brands delivering market and customer insights, data experts cannot fail to be inspired as Commvault GO helps them to Picture the Possibilities of how effective data management addresses their ever-changing data and business needs.
