

Raymond James Financial Honored with "Best Practices in Storage" Award at Storage Networking World

October 25, 2007

CommVault Software Helps Deliver Best Practices in the "Storage Reliability and Data Recovery" Category

OCEANPORT, N.J.--(BUSINESS WIRE)--Oct. 25, 2007--Raymond James Financial, Inc. (NYSE:RJF), a CommVault(R) (NASDAQ:CVLT) customer, has been recognized by IDG's Computerworld and the Storage Networking Industry Association (SNIA) as the Fall winner of Storage Networking World's (SNW) "Best Practices in Storage" award for "Storage Reliability and Data Recovery." Marking the second consecutive year that a CommVault customer has received this honor, the award recognizes the successful implementation of data management strategies and programs designed to ensure highly available information and data access.

As a leader in the fast-growing and heavily regulated financial services industry driven by explosive data growth, new technology and compliance pressures, Raymond James takes an aggressive approach to the company's IT investment. With over 600 terabytes of data in several hundred databases, streamlining data management while improving data accessibility is critical. By deploying CommVault software products the St. Petersburg, Fla., IT Department developed and executed a singular approach to backup, archive and disaster recovery to allow 25 percent faster backups and 75 percent faster recoveries. Raymond James also reduced overall operating costs and backup windows, while enhancing manageability and the company's confidence to meet internal and external compliance requirements.

"Protecting and recovering data have become prominent issues for many businesses, including Raymond James," said Bruce Phillipoom, vice president of information technology at Raymond James. "Our IT initiatives are designed to maximize resources, improve performance and ensure data integrity. CommVault provides us with a single, unified data management software platform that improves the availability of our data. Our backups are reliable, secure and consistent and finish long before we start our next business day - a critical aspect to maintaining our high levels of customer service and efficiency."

According to David West, CommVault's vice president of marketing and business development, Raymond James is a pioneer in the field of information technology. "Raymond James is an example of where leading-edge technology meets competitive advantage and we are extremely proud that Raymond James has been recognized for its innovative IT approach. As this award demonstrates, CommVault products enable customers to reduce complexity, increase flexibility and maximize performance in backup and recovery, while providing a single platform to unify protection and recovery across the IT environment."

SNW, the world's largest and foremost storage networking event, through its "Best Practices in Storage" awards program, identifies and acknowledges excellence among users of storage technology.

In choosing the winners, a panel of enterprise and storage industry experts evaluated 5 finalists based on case study submissions that profiled the companies, their IT departments and storage challenges, as well as application deployment details, summaries of the key technology used, strategic importance to the business and measurable results.

More information about the award, the honorees and the conference, can be found at <http://www.snwusa.com/awards.html#results> and to learn more about CommVault and CommVault customers like Raymond James, please visit the CommVault website at www.commvault.com/.
