

Freeman Health System Prescribes CommVault Simpana Software to Enhance High Levels of Patient Care and Compliance

December 7, 2009

— Healthcare Provider Relies on Simpana Software to Alleviate Email Pain,
Aid Legal Discovery and Bolster Backup and Disaster Recovery for Essential Email System —

OCEANPORT, N.J.--(BUSINESS WIRE)--[CommVault \(NASDAQ:CVLT - News\)](#):

News Facts

- - [Freeman Health System](#), a regional healthcare, three-hospital system serving 450,000 residents in Missouri, Kansas, Oklahoma and Arkansas, has deployed [CommVault® Simpana® software](#) to help alleviate the pressure of [compliance](#) and [eDiscovery](#) demands for maximum protection and availability of electronic medical records.
- - After replacing its legacy backup platform with the multi-module capabilities of Simpana software, Freeman reports that it has reduced its window to [backup](#) critical data from eight to two hours and significantly lowered administrative overhead with centralized management and granular reporting. By leveraging Simpana software's [Email Archive](#) and web-based [Search](#) modules, Freeman's Compliance Department has reduced the amount of time it takes to search and retrieve specific information. Additionally, Simpana software's [Replication](#) module offers an extra dose of protection for vital [Microsoft Exchange](#) email data while reinforcing the company's [disaster recovery](#) strategy.
- - By taking advantage of the single platform architecture of Simpana data and information management software, according to Freeman, the healthcare system has lowered costs, reduced overall risk, and improved its delivery of best practices, ISO-registered healthcare.

Simpana [Archive](#) Software Alleviates Email Pain while Search Reduces eDiscovery Concerns

- - According to Freeman Health System, Simpana software's archiving capabilities meet the Freeman Compliance Department's email retention requirements without requiring Freeman to purchase any additional hardware. Freeman now archives messages that can be content indexed, searched and retrieved quickly and efficiently from across roughly 1,500 Microsoft Outlook mailboxes belonging to hospital employees, physicians, and physicians offices. Simpana software has also helped contain growth of email storage.
- - Simpana's Search module provides immediate access to all types of data across backups, archives, as well as online and offline repositories. Using CommVault software's Search web interface enables Freeman's HR and Compliance Departments to conduct email and other data searches as part of eDiscovery without any IT intervention.
- - Additionally, the Simpana Replication module will allow Freeman to access archives and retrieve deleted emails, attachments and other data for accelerated disaster recovery.

Supporting Quotes

- - "Data stewardship is a key issue for us," says Tom Ellicott, Network Specialist for Freeman Health System. "So, we work closely with our Compliance Department to adhere to best practices in retaining data of all kinds, including emails. With CommVault Simpana software, we have found a robust solution that gives us an extra measure of data protection from disasters while also easing data movement, archiving and discovery for compliance."
- - "CommVault Simpana software and all its modules work well to give us peace of mind in knowing that we can do much more than protect data. With CommVault as a strategic ally, we can continue to fulfill our mission of delivering best practices, ISO-registered healthcare excellence," Ellicott added.
