Temple University Health System to Present at HIMSS 2010 Annual Conference

March 1, 2010

CommVault Customer to Discuss Best Practices for eDiscovery Implementation

OCEANPORT, N.J., Mar 01, 2010 (BUSINESS WIRE) -- CommVault (NASDAQ:CVLT):

News Facts:

- Tracy Kirsteins, Director of IT at Temple University Health System, a CommVault(R) Simpana(R) software customer, will discuss how the company realized substantial email storage efficiencies with an archiving solution at this year's HIMSS 2010 Annual Conference.
- When companies streamline information access and eDiscovery and enable a consistent, repeatable and defensible strategy for this data, they put themselves in a far better position to respond to legal requests. Kirsteins will outline the steps and technologies required to ensure regulatory compliance of growing quantities of patient data.
- Kirsteins will also discuss regulations such as the HIPAA and JCAHO Acts and their impact on healthcare, specific to changing technology requirements.
- While other solutions encourage a siloed approach to information management, CommVault Simpana software uniquely addresses information risk with a single console and a single infrastructure. This can provide a holistic and risk-averse approach to the access, retention and disposition of information records, especially as business requirements change over time.
- CommVault will be exhibiting on the HIMSS show floor at booth #3010 where they will be showcasing Simpana software with an emphasis on CommVault's information management solution for eDiscovery and Compliance.
