

## CommVault Named a 'Champion' in Info-Tech Research Group's Enterprise Backup Software & Email Archiving Landscape Reports

April 10, 2012

**With Award-winning Backup and Archive Solutions, CommVault Dramatically Simplifies Management, Protection and Retention of 'Big Data' --**

OCEANPORT, N.J., April 10, 2012 /PRNewswire via COMTEX/ --[CommVault](#) (NASDAQ: CVLT) -- The exponential growth of digital data, "Big Data" is challenging organizations' abilities to store, protect, retain and recover vital information. There simply isn't enough time, resources or budget to manage, protect, index, retain and quickly recover the ever-growing amounts of data using legacy methods and tools. CommVault has developed state of the art data movement and indexing capabilities combined with the convergence of back up and archiving in order to reduce data management operational issues and reduce costs. CommVault's technology innovations have been recognized by the Info-Tech Research Group which ranked CommVault as an industry "Champion" in both Enterprise Backup Software and Email Archiving. CommVault is uniquely positioned to address this convergence with its single platform architecture and continuing innovation leadership.

### News Facts

- The Info-Tech Research Group has named CommVault a "Champion" in both Enterprise Backup and Email Archiving in a pair of recent reports: [Info-Tech Research Group's Enterprise Backup Software Vendor Landscape](#)[1] and [Info-Tech Research Group's Email Archiving Vendor Plus Landscape](#)[2].
- According to Info-Tech Research Group, these latest industry reports recognize outstanding vendors in the technology marketplace by assessing the strength of their offerings and ability to deliver excellent value to customers. Champions receive high scores for most evaluation criteria, having a strong market presence and usually represent trendsetters for the industry.
- In the realm of backup and recovery, Info-Tech Research Group named CommVault a Champion for a second consecutive year. In this report, Info-Tech states that "CommVault offers a comprehensive portfolio of data management and compliance products beyond just data protection, with advanced support for virtual server backup."
- In its latest email archiving report, Info-Tech Research Group acknowledged CommVault for its "holistic content archiving solution that offers extensive feature functionality."
- According to Info-Tech Research Group, CommVault's flexible hybrid archiving infrastructure enables customers to choose where to store data in the cloud along with intuitive administrator and end-user interfaces that make it easy to navigate, resulting from deep integration with Microsoft Exchange and other repositories.

### CommVault Addresses Backup, Recovery and Archive Convergence with Simpana® OnePass(TM) Functionality

- In addition to its industry-leading backup, recovery and archive functionality, CommVault is uniquely positioned to address the ongoing convergence of these crucial areas with [Simpana OnePass](#) technology. An industry first, this capability combines backup, archive, analytics and deduplication into a single process designed to reduce combined operations time by more than 50 percent compared to traditional methods.
- With Simpana OnePass, information from a single data collection is copied, indexed and stored in Simpana ContentStore -- an intelligent, virtual repository that provides an efficient and scalable foundation for eDiscovery, data mining and more.
- In addition, data analytics and reporting can be performed from the index to help classify data and implement archive policies for data tiering to lower-cost media, thereby further reducing total cost of ownership (TCO).
- According to a recent [Lab Review conducted by Enterprise Strategy Group](#)[3], OnePass "appreciably reduced overall data protection jobs, as well as reduced impact to the production of servers due to [its] consolidated network and disk operations." ESG states that the result of OnePass is "so intuitive that it should be the measure by which other unified products aspire...where functionality/technologies become folded into a single agent talking to a unified back end."

### Supporting Quotes

**David West, Senior Vice President, Marketing and Business Development for CommVault:**

- "CommVault continues to be recognized by leading analyst firms as a leader in the market for backup, recovery and archiving. This latest designation is another proof point that CommVault and its Simpana software is transforming the way our entire industry must look at modern data management."
- "The growing acceptance of CommVault Simpana OnePass also solidifies our position as the only vendor that offers

backup and archiving from a single, unified platform and common code base. This unique capability puts CommVault ahead of the curve in addressing the convergence of backup and archiving to meet the requirements of tomorrow today."

**Chris O'Connor, Research Analyst, Info-Tech Research Group:**

- "With exceptional marks for ease of use and hardware integration, CommVault is worth a look for organizations looking to get all the bells and whistles with minimized management overhead."
