

## M+K Lawyers Court Storage Savings with Commvault and Pure Storage

February 10, 2016

- De-duplication delivers 90 percent reduction in data at the source
- Pure Storage Flash Array and Commvault integration optimises backup times and application performance
- Nearly 60 percent reduction in helpdesk requests shifts IT team from technician to strategic enabler

SYDNEY, Feb. 10, 2016 /PRNewswire/ -- [Commvault \(NASDAQ: CVLT\)](#), a leader in data protection and information management, today announced that Australian based law firm, M+K Lawyers, has adopted the Commvault Data Platform and Pure Storage FlashArray to drive savings, speed and security through holistic management of their information assets.

M+K has deployed Commvault on virtualised servers and Pure Storage flash array in order to optimise application performance, better manage data growth as a result of rapid expansion and provide the flexibility needed to respond to future change.

With 45 principals, 275 staff and a footprint that stretches along the East coast, M+K Lawyers needed to ensure a holistic data management strategy with assurance that their business information would be available as required.

Matt Purves, M+K's national infrastructure manager, explained, "We work in a highly competitive environment where time is literally money and every six minutes is billed, so it is essential that our systems deliver speed and reliability to support the business. Every minute saved in application performance can mean a spike in revenue."

When first adopting Commvault software for streamlined information management including backup, disaster recovery and archiving, the de-duplication capabilities enabled M+K to reduce the amount of data they needed to manage by 90 percent – driving significant cost savings and network efficiencies. "Since then, the introduction of Pure Storage, a leading provider of all-flash storage, enabled the firm to deliver more productivity gains through strong native integration with Commvault."

"The integration of Pure Storage and Commvault has driven backups down to under 30 minutes and reduced latency problems with applications," said Marcus Nessel, network administrator for M+K Lawyers. "With the reliability and speed offered by the high performing data platform and flash storage, we have seen nearly 60 per cent reduction in tickets to the help desk and fewer application errors, freeing up the IT team to have less of a technical support focus and more of a strategic business enabler."

Craig Wiley, Director of Systems Engineering for Commvault Australia and New Zealand, said, "In a competitive market such as the legal industry, it's important that all the technology processes are built to make the lawyers and their supporting team as effective as possible. Through holistic data management, businesses can ensure that all employees have the information they need at their fingertips with minimal interruption, while efficiently controlling data management costs and risk."

### About Commvault

Commvault is a leading provider of data protection and information management solutions, helping companies worldwide activate their data to drive more value and business insight and to transform modern data environments. With solutions and services delivered directly and through a worldwide network of partners and service providers, Commvault solutions comprise one of the industry's leading portfolios in data protection and recovery, cloud, virtualization, archive, file sync and share. Commvault has earned accolades from customers and third party influencers for its technology vision, innovation, and execution as an independent and trusted expert. Without the distraction of a hardware business or other business agenda, Commvault's sole focus on data management has led to adoption by companies of all sizes, in all industries, and for solutions deployed on premise, across mobile platforms, to and from the cloud, and provided as-a-service. Commvault employs more than 2,000 highly skilled individuals across markets worldwide, is publicly traded on NASDAQ (CVLT), and is headquartered in Tinton Falls, New Jersey in the United States.
