

Commvault Extends Platform Capabilities for Healthcare by Adding EHR and ERP Application Decommissioning and Data Aggregation

February 21, 2017

Partners with Harmony Healthcare IT to enable Commvault customers to access, manage and protect data from retired legacy applications

ORLANDO, Fla. and TINTON FALLS, N.J., Feb. 21, 2017 /PRNewswire/ -- **HIMSS17 - Commvault** (NASDAQ: CVLT), a global leader in enterprise backup, recovery, archive and the cloud for the healthcare market, today announced a technology collaboration with Harmony Healthcare IT, a leading provider of services and solutions that safeguard patient information, ensure cash flow, and increase productivity. Through the integration of the Commvault Data Platform with Harmony Healthcare IT's archiving solution, [Health Data Archiver](#), healthcare customers can manage the complicated process of decommissioning legacy applications by retiring Electronic Healthcare Records (EHR) and Enterprise Resource Planning (ERP) systems while enabling them to access and protect important clinical and business data. Today's announcement was made at HIMSS 2017, being held Feb. 19 – Feb. 23, in Orlando.

In addition to data management and protection, customers using the Commvault Data Platform with Health Data Archiver gain increased analytics capabilities by having data from decommissioned applications available for indexing and reporting through Commvault Software, as well as expanded eDiscovery and search functionality.

"We are pleased to team up with Commvault to empower healthcare providers to embrace holistic data management strategies that modernize the way they manage, migrate and share clinical data," said Tom Liddell, CEO, Harmony Healthcare IT. "With the addition of our product and services, Commvault Clinical Archive gives customers the power to derive the most value out of all data, regardless of whether it's in production use or from decommissioned applications."

The collaboration between Commvault and Harmony Healthcare IT, extends Commvault's data management portfolio and archiving capabilities in EHR and ERP application decommissioning. In tandem with [Commvault Clinical Archive](#), announced at HIMSS last year, Commvault is transforming the way healthcare providers are managing, migrating and retiring EHR, and other legacy applications. As a result, customers are breaking down data silos, reducing storage costs and complexity, enable better data sharing, and eliminating the burden of maintaining and supporting legacy applications.

"As healthcare providers recognize the tremendous operational and financial benefits in decommissioning outdated legacy applications, data from those systems will still need to be accessed, managed and protected since it often needs to be retained for business, compliance and regulatory reasons," said Ananth Balasubramanian, General Manager of Commvault's Healthcare Solutions Group. "With customers now able to use Health Data Archiver to decommission legacy applications, they can optimize healthcare IT operations, reducing maintenance application costs, while accessing and managing critical clinical and business data."

Harmony Healthcare IT and Commvault will both be exhibiting at the [HIMSS17 Conference & Exhibition](#) on February 19-23. Commvault will be at booth #1703. Harmony Healthcare IT will be at booth #7760

About Commvault Healthcare

[Commvault](#) is a leading provider of data protection and information management solutions, helping healthcare organizations worldwide handle massive volumes of data, meet compliance requirements and deliver quality patient care. Through its single integrated platform, the Commvault Data Platform, Commvault provides healthcare organizations with enterprise data protection, enabling them to scale infrastructure easily and cost-effectively while maintaining the security and privacy of patient information. Commvault Software includes data encryption capabilities, enabling healthcare providers to meet the Health Insurance Portability and Accountability Act (HIPAA), Health Information Technology for Economic and Clinical Health (HITECH) Act and other patient data privacy compliance requirements.

About Commvault

Commvault is a leading provider of data protection and information management solutions, helping companies worldwide activate their data to drive more value and business insight and to transform modern data environments. With solutions and services delivered directly and through a worldwide network of partners and service providers, Commvault solutions comprise one of the industry's leading portfolios in data protection and recovery, cloud, virtualization, archive, file sync and share. Commvault has earned accolades from customers and third party influencers for its technology vision, innovation, and execution as an

independent and trusted expert. Without the distraction of a hardware business or other business agenda, Commvault's sole focus on data management has led to adoption by companies of all sizes, in all industries, and for solutions deployed on premise, across mobile platforms, to and from the cloud, and provided as-a-service. Commvault employs more than 2,700 highly skilled individuals across markets worldwide, is publicly traded on NASDAQ (CVLT), and is headquartered in Tinton Falls, New Jersey in the United States.
