Randstad Global IT Solutions Centralizes Backup and Recovery Using Commvault for its AWS global cloud infrastructure

AMSTERDAM and TINTON FALLS, N.J., June 7, 2017 /PRNewswire/ -- [Commvault](#) (NASDAQ: CVLT), a global leader in enterprise backup, recovery, archive and the cloud, today announced that it will be providing full cloud backup and recovery solutions for Randstad across its global infrastructure. Randstad is using AWS cloud infrastructure as the basis for its new central Shared Service Centre (SSC) to deliver global IT services, and will be utilizing Commvault to maximize this offering.

The Randstad Group is a global leader in the HR services industry and specializes in solutions in the field of flexible work and human resources services. The company's IT infrastructure is currently being consolidated and centralized across 30 IT departments providing services to 40 Operating Companies in Europe, North and South America, the Middle East and Asia-Pacific. This transformation will increase efficiency, reduce risk and provide better service from an IT infrastructure perspective in alignment with Randstad's global digital vision.

"Given the scale and business criticality of this AWS deployment, we needed a trusted provider to support this transformation with a robust and compatible solution," said Bernardo Payet, General Manager for Randstad Global IT Solutions. "Commvault was chosen based on their ability to deliver the scalability and flexibility of service necessary to complete the task in exact accordance with our requirements."

In addition, the Commvault platform delivered deduplication and compression functionality, which will reduce storage consumption and save significant costs. Another critical reason for the selection was the proven integration between Randstad's AWS based public cloud strategy, managed by Tata Consultancy Services (TCS) and Commvault's solutions.

TCS, a global leader in IT services, digital and business solutions, is working with Randstad on its migration to AWS. Due to the global nature and scale of the deployment, TCS recommended Commvault based on its global capabilities and market leading technology.

"Commvault software will enable high performance and simplified data management as Randstad migrates to a global AWS-based cloud approach," said Rob Van Lubek, Area-Vice President EMEA Northwest, Commvault. "Randstad needed to ensure its data would be protected, compliant and accessible while taking advantage of cloud storage benefits and Commvault is pleased to be enabling this journey."

About Commvault in the Cloud

Commvault enables automated, policy-based data movement between on-premises storage and server infrastructure with the flexibility to store data in Amazon Simple Storage Service (S3) or Amazon Glacier, or the ability to move entire workloads directly into EC2 instances. Cross-platform integration with over 25 cloud providers also enables management processes in EC2 along with other cloud platforms, including VMware, Microsoft Azure and Microsoft Hyper-V.
